

# Les fractions >1

Lis et comprend les exemples

il y a 5 parts mais les gâteaux sont coupés en 3  $\rightarrow \frac{5}{3}$

$$\frac{5}{3} = \frac{3}{3} + \frac{2}{3}$$

$$\frac{5}{3} = 1 + \frac{2}{3}$$

$$\frac{6}{3} = \frac{3}{3} + \frac{3}{3}$$

$$\frac{6}{3} = 2$$

$$\frac{7}{3} = \frac{3}{3} + \frac{3}{3} + \frac{1}{3}$$

$$\frac{6}{3} = 2 + \frac{1}{3}$$

$$\frac{7}{5} = \frac{5}{5} + \frac{2}{5}$$

$$\frac{7}{5} = 1 + \frac{2}{5}$$

$$\frac{11}{5} = \frac{5}{5} + \frac{5}{5} + \frac{1}{5}$$

$$\frac{11}{5} = 2 + \frac{1}{5}$$

$$\frac{11}{6} = \frac{6}{6} + \frac{5}{6}$$

$$\frac{11}{6} = 1 + \frac{5}{6}$$

A ton tour

$$\frac{6}{4} = \frac{4}{4} + \frac{2}{4}$$

$$\frac{6}{4} = 1 + \frac{2}{4}$$

$$\frac{4}{3} = \frac{3}{3} + \frac{1}{3}$$

$$\frac{4}{3} = 1 + \frac{1}{3}$$
